

Drains & CCTV

- Drain descaling
 - Drain lining
 - Drain excavation
 - Drain repair
 - Emergency blockage clearance
 - Fat & grease removal
 - Surface cleaning (using high pressure water jets)
 - Drain surveys / reports (using CCTV)
 - Tree / root cutting
- Our very experienced engineers are available for call-out 24hrs a day, and offer a fast and efficient service. Most blockages can be cleared within an hour of arrival. We operate a 'can do first visit' approach. Should there appear to be a fault in the line, further investigative work can be carried out to establish what the real cause of the problem is. Our CCTV cameras can survey anything from small bore pipes using the latest hand held push rod system, to 900mm diameter pipes using the larger tractor units. All of our surveys come complete with a written report giving comprehensive and concise details of the drain surveyed with any recommendations for remedial works. The report is accompanied by the original video copy of the survey for the client to see.
