

RM Contractors - Safe, professional, high quality services

RM Contractors have set out with a simple goal in mind, to continue to provide a quality reliable service to all our customers. A service that covers a diverse range of products and delivers them to a high level without compromising on safety, the environment or professionalism. This is not always easy in today's market but we believe we have achieved exactly that. From our humble beginnings as a cleaning firm we have grown, in just under 20 years, to become a nationwide provider of professional contractors. All our staff are fully insured and are trained in, and aware of, Health & Safety regulations. This has been reflected in our Safe Contractor accreditation and many other affiliations with governing bodies. From your initial contact with us we will appoint a Contracts Manager to be a sole point of contact for your company, who will understand your business and its needs. Our aim is to complete a site survey where necessary for each individual contract followed by a proposal, risk assessment and method statement ensuring a clear approach to the task. Once the job has been completed we can issue Certificates of Conformity for your records and peace of mind.
