

Environmental Policy

We recognise that our activities will, inevitably, have an impact on the environment. As a result RM Contractors are committed to a process of continual environmental improvement and pollution prevention. It is the policy of RM Contractors to minimise the impact of our operations on the environment. We encourage energy efficiency and promote and implement waste minimisation and environmentally friendly waste disposal. RM Contractors respects and adheres to all relevant environmental legislation and regulations but regard them as a minimum standard and wherever possible we exceed them. We identify and utilise opportunities to reduce and recycle any resources we consume. This includes water, energy and all other natural resources thereby minimising the amount of waste our organisation produces. RM Contractors is committed to delivering the highest quality solutions to meet our customers' needs. We are dedicated to continually improving and maintaining standards and investing in systems, training and procedures that enable us to constantly improve our performance and efficiency.
